PROFESSIONAL EXPERIENCE

Consultant in the Regional Integration Unit

Inter-American Development Bank (IADB)

- Developed sub-municipal level databases for the Amazon Region utilizing georeferenced data (QGIS), along with machine learning processing in R for data cleaning and treatment. Analysis is now as a working paper
- Analyze the spatial organization of international trade using HS6 codes from CEPII data to understand changing trading baricenters.

**Paris, France
(Remote)**
10/2024 – 5/2026

Data Manager and Developer

Voxmapp

- Create and analyze databases utilizing both PSQL/PLSQL with relation to development programs including governments and NGO's. Create and organize data visualizations using Apache Superset. Carry out data scraping and NLP on open access data using Python.

Paris, France
05/2023 - 08/2024

Programmer and assistant researcher on Care economics in Mexico

Instituto Tecnológico de Estudios Superiores de Monterrey

- Programmed the code for the Shiny App that visualized the results of the winning research on the economic value of care on the Mexican economy. Assisted on literature revision with ITESM professors. Used R and STATA.

**Monterrey,
Mexico**
1/2023 – 06/2023

Co-Investigator and Co-Writer of investigation articles

Centro de Investigación Económica y Presupuestaria (CIEP)

- Co-wrote an investigation article that analyzes the effects that taxes have on the distribution of inequality in México as part of CIEP. “*La desigualdad y los impuestos*”.

Monterrey, Mexico
08/2021 – 12/2022

EDUCATION

Paris 1 Panthéon-Sorbonne

MSc. in Development Economics

- Focused on Development Economics, Applied Econometrics, Rural and Urban development, Remote Sensing, and Big data analysis.
- M2 Thesis: Elaborated a multimodal transportation network for land and rivers in the Amazon to measure spatial heterogeneous effects of an education public program in Brazil

Paris, France
09/2024-06/2026

Instituto Tecnológico de Estudios Superiores de Monterrey

Bachelor of Economics - Final grade: 95.1

- *Specialized in Data Science for the public good where I modeled a calculator of the cost of care in Mexico using Python, R, and Netlogo.*

Monterrey, Mexico
02/2020 – 06/2024

PUBLICATIONS

Date	Title	Status
April 2024	La Evaluación De Impacto De Programas Sociales En México: Revisión De Literatura	Forthcoming
May 2025	Bridging Data Gaps in Amazonia: A Grid-Based GDP Estimation Using Remote Sensing and Machine Learning	Working Paper
